Business Spotlight

Kaseman Machine, is a locally owned and quality manufacturer of general machining parts for recreational and all terrain vehicles, medical, military and other miscellaneous device markets. Kaseman has a diverse range of machining capabilities allowing them to provide full service, custom metal and plastic fabrication. Their machining capabilities include 18 CNC turning and milling machines and pallet changing machines. Kaseman offers precision machining and manufacturing engineering services and is versatile enough to provide quality fabrication services to a wide range of customers and needs which is essential to today's most demanding markets. Their continued success is contributed to the fine tuning of their processes and procedures for each machined product. The improvements have since increased efficiency and improved delivery while also reducing the plant's environmental impact. Kaseman's recent 8,400 sqft expansion to their existing building is scheduled to be completed by April 1st. This expansion is a considerable investment toward projected growth opportunities in the near future. Additionally, the expansion will enable them to continue working more efficiently with their existing customers and generate new customers in the region.

Passive Components and Laser Works Inc. specializes in the passivation of stainless steel and titanium. Passivation is helpful in preserving the appearance of stainless steel which leads to a highly-desired, low corrosion rate of the metal. They provide high-quality, full service passivation of machined stainless steel and titanium products to a wide range of customers in the medical, aerospace, defense and other miscellaneous industry sectors. They also do chromate conversion coatings on aluminum and laser marking/etching. They will also be offering Type II (decorative) anodizing late spring 2013. Their highly trained and knowledgeable staff has a deep understanding of the science behind preserving the appearance of metallics which continues to drive the market.

Thank you to Len Kaseman and Chris and Kathy Arnold from Kaseman Machine and to Jeff Dotson, owner of Passive Components and Laserworks in addition to all of your staff for your continued dedication and hard work. We appreciate having your businesses in the City of Becker!

Greetings,

I am both honored and excited as I have begun to serve as Mayor for the city of Becker. I believe that it's important to stay connected and to interact with the public. One of the ways I intend to do this is to hold monthly "Meet with the Mayor" meetings beginning **March 23rd at Café Pawz from 8:30am - 10:00 am**. We need to keep the public informed on issues, address concerns and find reasonable solutions. I believe that citizen involvement is one of the biggest assists that a healthy city possesses. We need to continue working with our local businesses and volunteer clubs. We also need to focus on bringing new businesses and opportunities to our community.

Thank you for all of your support. I look forward to serving the next 4 years as your Mayor.

Hope to see you at Café Pawz!

Sincerely,
Jerome (Lefty) Kleis

In Case of a Motor Vehicle Crash

Keep your vehicle registration information and proof of insurance in a file. Traffic crashes occur on Minnesota highways at a rate of nearly 300 per day. If you are involved in a collision or encounter a crash scene, it is important that you know what to do, who to contact, and what information to record for future use. If you are in a crash that results in personal injury, death or property damage totaling \$1,000 or more, you must file a report with the Minnesota Department of Public Safety within 10 days. To complete the report, you will need certain information about the drivers, vehicles and crash scene. Record this information at the time of the crash to save time and ensure accuracy. Minnesota Motor Vehicle Accident.

Reports are available on the Web at www.dps.state.mn.us/dvsv or through your local law enforcement agency.
